Objective

AI for boosting productivity

Objective

~~AI for boosting productivity~~

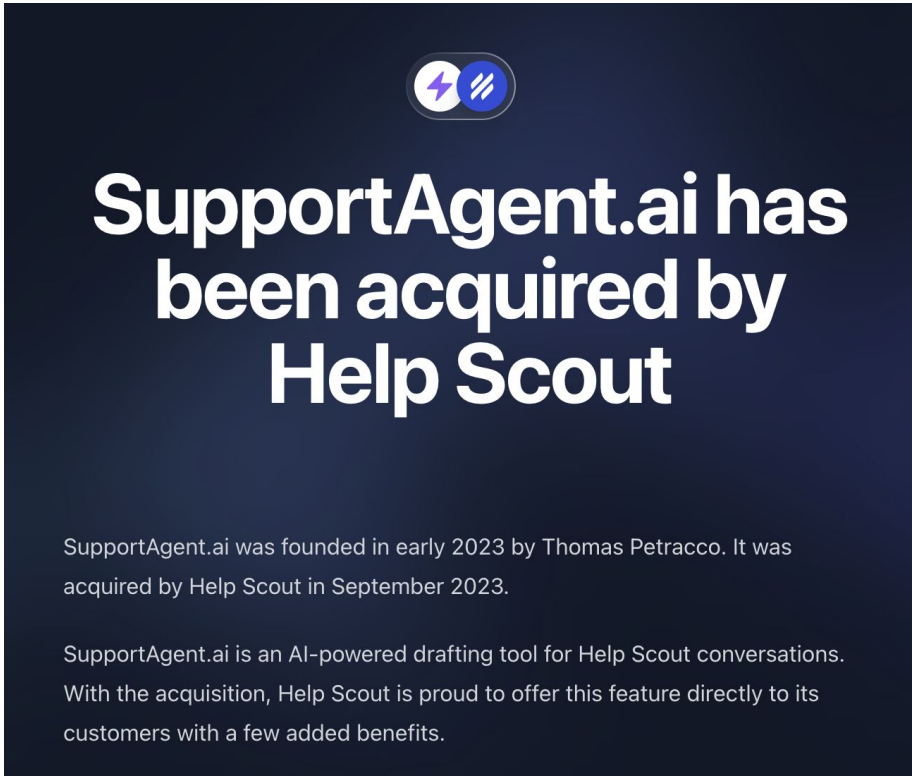

AI to give more “slack”, which fuels innovation and continuous improvement

Experiment definition

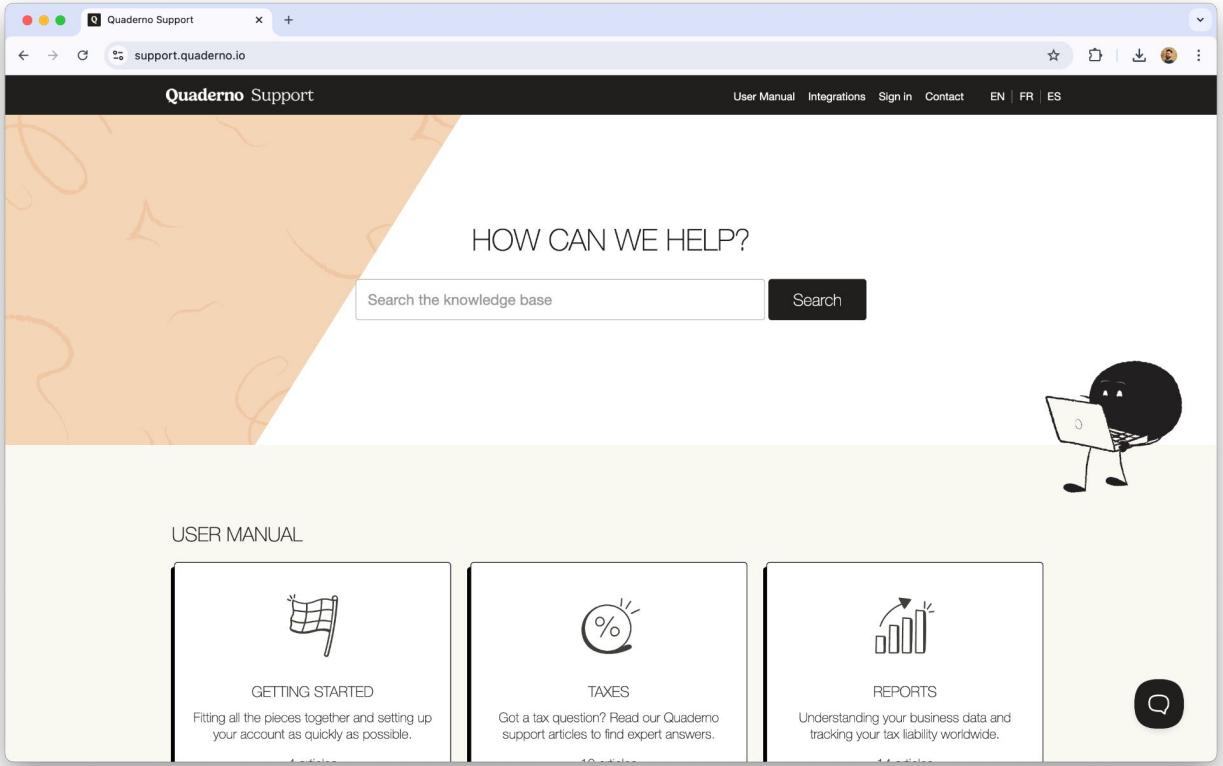

~~One month~~ → two months

Only drafts, AI won’t talk with customers

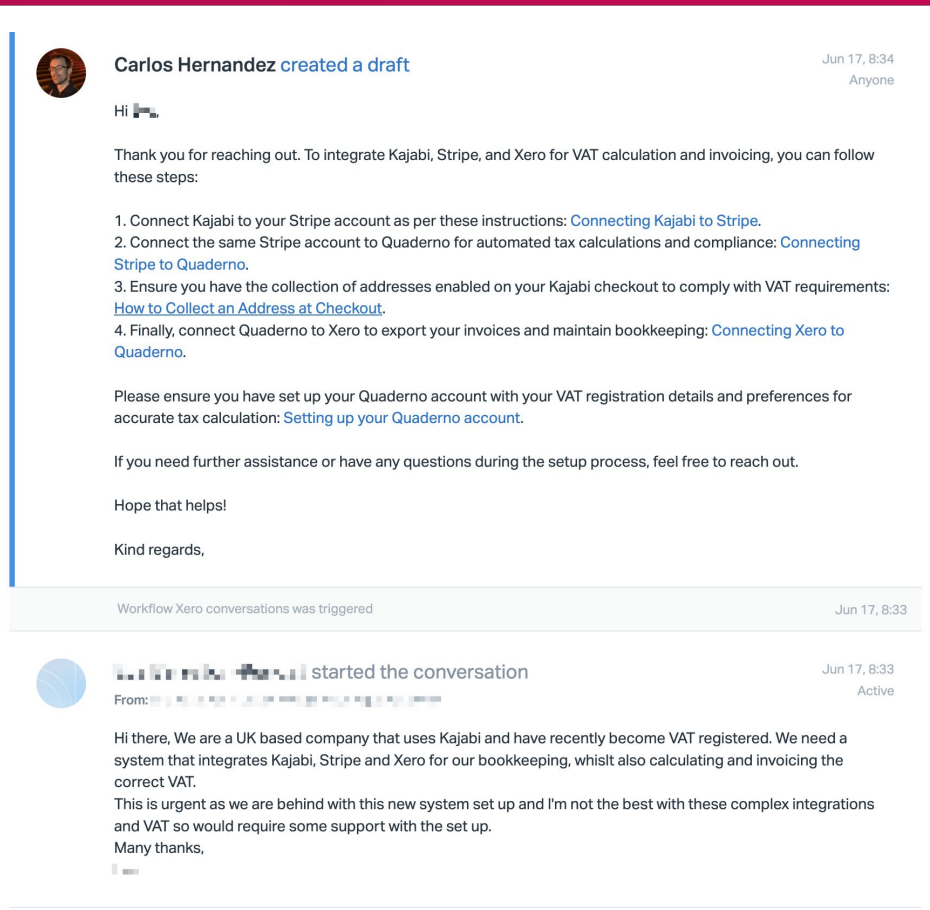

Tooling

SupportAgent.ai has been acquired by Help Scout
SupportAgent.ai was founded in early 2023 by Thomas Petracco. It was acquired by Help Scout in September 2023.
SupportAgent.ai is an AI-powered drafting tool for Help Scout conversations. With the acquisition, Help Scout is proud to offer this feature directly to its customers with a few added benefits.

Feeding the AI

Testing the AI – Best example

Carlos Hernandez created a draft

Anyone

Hi [redacted],

Thank you for reaching out. To integrate Kajabi, Stripe, and Xero for VAT calculation and invoicing, you can follow these steps:

1. Connect Kajabi to your Stripe account as per these instructions: Connecting Kajabi to Stripe.
2. Connect the same Stripe account to Quaderno for automated tax calculations and compliance: Connecting Stripe to Quaderno.
3. Ensure you have the collection of addresses enabled on your Kajabi checkout to comply with VAT requirements: How to Collect an Address at Checkout.
4. Finally, connect Quaderno to Xero to export your invoices and maintain bookkeeping: Connecting Xero to Quaderno.

Please ensure you have set up your Quaderno account with your VAT registration details and preferences for accurate tax calculation: Setting up your Quaderno account.

If you need further assistance or have any questions during the setup process, feel free to reach out.

Hope that helps!

Kind regards,

Workflow Xero conversations was triggered — Jun 17, 8:33

Active

Hi there, We are a UK based company that uses Kajabi and have recently become VAT registered. We need a system that integrates Kajabi, Stripe and Xero for our bookkeeping, whislt also calculating and invoicing the correct VAT.
This is urgent as we are behind with this new system set up and I'm not the best with these complex integrations and VAT so would require some support with the set up.
Many thanks,
[redacted]

Testing the AI – Good example, but…

Hi [redacted],

We offer all our support through this channel (Email), so please feel free to let us know any questions or doubts you might have regarding the finalization of your setup. We'd be more than happy yo help and guide you through the process.

If you'd prefer instead to have a quick call with our Sales team to review how Quaderno works and if could be a good fit for your business (but not for support), you can schedule one by filling in the form on our website: https://quaderno.io/contact-sales/.

Hope that helps!
Kind regards,

Hi [redacted]

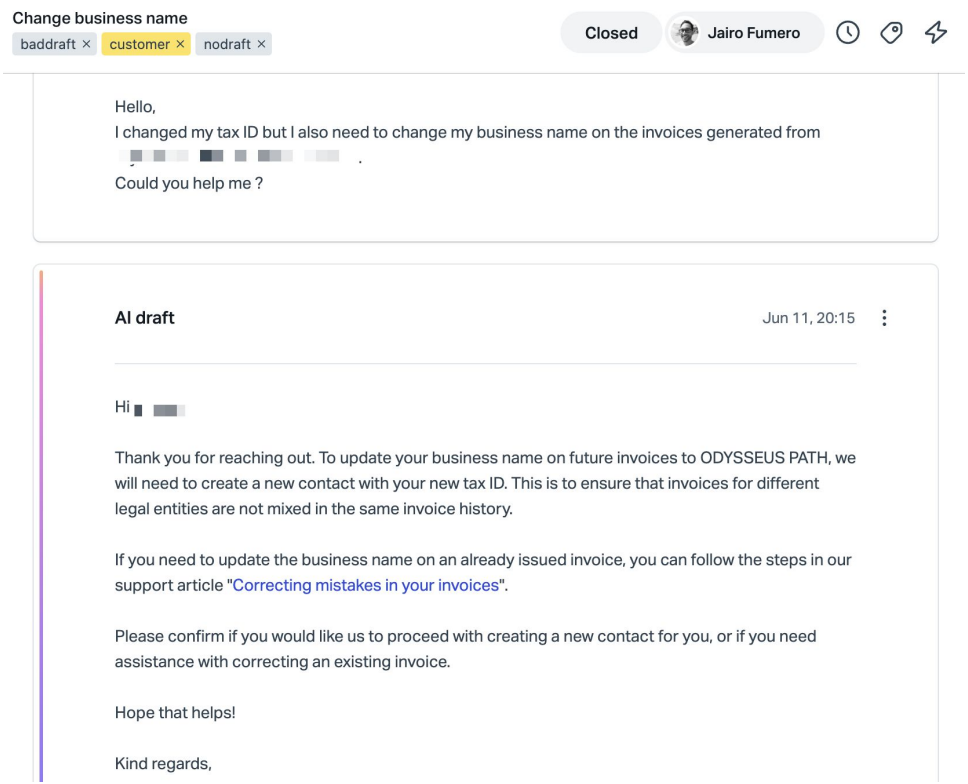

We offer all our support through this channel (Email), so please feel free to let us know any questions or doubts you might have regarding the finalisation of your setup. We're here to guide you through the process.

If you'd prefer to have a quick call with our Sales team, you can schedule one by filling in the form on our website: https://quaderno.io/contact-sales/.

Hope that helps!

Kind regards,

Testing the AI – Deceptive example

Final qualitative feedback

PROS	CONS
Helps with email structure	Feels like 30-40% accuracy rate
Good at answering regular questions	Makes up things (especially on bugs / incidences)
Saves typing time	Time lost validating AI drafts

Quantitative metrics

During ticket resolution, our support people **tagged AI drafts** with:

- **gooddraft** : partially reusable
- **baddraft** : wrong answers
- untagged: not wrong, but not good enough

”Quantitative” metrics

First month:

- baddraft → 76 // ~29% (47 last week)
- gooddraft → 59 // ~**23%**
- Total drafts → 260 // so, 125 untagged

”Quantitative” metrics

Second month:

- baddraft → 105 // ~34%
- gooddraft → 111 // **~36%**
- Total drafts → 307 // 91 untagged

Experiment result

Disabled automatic AI drafts

Now, we manually ask for AI drafts

Experiment result

Would you guess the number of AI drafts created last month?

Zero

Questions & Answers time!

What would have you done differently?

Do you have any similar experiences to share?

Thanks

for your time!
